

The DO-178C Certification Lifecycle

Objectives, Evidence and Audit

A Practitioner's Guide to Airborne Software Compliance

DOCUMENT CONTROL	
Title	The DO-178C Certification Lifecycle — Objectives, Evidence and Audit
Document Ref.	BNX-WP-DO178C-001
Version	1.0 · 2026
Author	Bhanuprakash H P · Director, BHANEXUS LTD
Reviewers	BHANEXUS Technical Review Board
Standards	DO-178C · DO-330 · DO-331 · DO-332 · DO-333 · ARP4754B · ARP4761A
Classification	Public — approved for external distribution and publication
Website	www.bhanexus.com

Contents

1. Introduction	
2. Regulatory Foundation	
2.1 Related documents in the DO-178C family	
3. What DO-178C Is — and Is Not	
4. System Safety Context and Level Allocation	
4.1 Failure condition categories and software levels	
4.2 Architectural strategies that influence level	
5. What Actually Changes With Software Level	
5.1 Objectives by level	
5.2 Independence	
5.3 Control categories	
6. The Life Cycle Process Model	
6.1 Transition criteria	
6.2 Derived requirements	
7. Plans and Standards	
7.1 The plan set	
7.2 What reviewers examine in a plans review	
7.3 Life cycle environment planning	
8. Development Processes	
8.1 Requirements	
8.2 Architecture	
8.3 Code and integration	
9. Traceability	
10. Verification: Reviews and Analyses	
10.1 Source Code accuracy and consistency	
10.2 Integration output review	
11. Verification: Testing	
11.1 Test case selection	
11.2 Test methods	
12. Structural Coverage and Its Resolution	
12.1 Coverage criteria by level	
12.2 Resolving unexecuted code structure	
13. Configuration Management	
13.1 The six objective groups	
13.2 Problem reports	
13.3 Indexes	
14. Software Quality Assurance and Conformity Review	
14.1 The software conformity review	
15. Certification Liaison and Stages of Involvement	
16. Tool Qualification	
16.1 Determining the level	
17. Supplements	
18. Additional Considerations	
18.1 Previously developed software and COTS	
18.2 Parameter data items	
18.3 Option-selectable, field-loadable and user-modifiable software	
18.4 Product service history	
19. Common Findings and Failure Modes	
20. Conclusion	
21. SOI Readiness Checklists	
22. Glossary	
23. References
